PROFESSIONAL SUMMARY

Full-stack Software Engineer specializing in Laravel and the TALL stack, with combined freelance and corporate experience building and shipping production systems end-to-end. Promoted to Software Engineer within 6 months for independently delivering three live systems at a corporate ITAD company. Open-source contributor with 8,300+ Composer package downloads across two published packages.

WORK EXPERIENCE

Software Engineer

January 2026 - Present

Casterly Ventures Corp.

Pasig City, Philippines

- Promoted within 6 months for independently delivering three production systems.
- Migrated production from Cloudways to a self-managed Hostinger KVM4 VPS, cutting annual hosting costs by 72% (PHP40,320 to PHP11,544/yr) with 4x RAM and 2x CPU.
- Built atomic GitHub Actions deployment pipelines and managed Redis queue infrastructure with 8 workers, reducing deploy time by 70%.
- Improved IMS performance with composite indexes and Redis caching across 32 navigation queries; integrated third-party APIs including Google Drive for automated report backups.
- Built a POS system with barcode scanning and dynamic pricing, cutting job order release time from 60 to 30 minutes and processing 3,700+ transactions.
- Replaced a manually-updated Excel inventory process with a real-time Warehouse Management System, giving operations staff full traceability of inventory items for the first time.

Software Developer

July 2025 - December 2025

Casterly Ventures Corp.

Pasig City, Philippines

- Sole developer of a full-stack IMS processing 3,700+ ITAD devices through an 8-stage automated workflow, used daily by 20+ technicians; architected as a modular monolith with a service-layer pattern for long-term maintainability.
- Automated laptop spec extraction via Blancco/SpecCy XML parsing, removing manual data entry for technicians; added queued report generation and WebSocket-based live updates via Laravel Reverb.
- Built **casterly.ph** with a custom Filament CMS so non-technical staff can manage site content independently.
- Developed the **shop.casterly.ph** backend with order processing, COD payment integration, promo codes, and real-time shipment tracking via TrackingMore API.

Backend Developer Intern

February 2025 - April 2025

Bapplware Technologies, Inc.

Mandaluyong City, Philippines

- Developed RESTful API modules for the HRP-API platform using PHP Symfony, translating business requirements into technical specifications and working endpoints within an Agile team environment.
- Implemented error handling, soft deletes, and data integrity standards across multiple API endpoints.
- Wrote PHPUnit test cases to maintain code quality and catch regressions before deployment.

Freelance Developer

June 2020 - January 2025

Remote

- Built a desktop Employee Management System for the Philippine Air Force HSSG using Java Swing with role-based access control and reporting.
- Developed a web-based Internship Management System for the University of Rizal System using Laravel and FilamentPHP.
- Built a full-stack seafarer certification system for a private client using Laravel and FilamentPHP with facial recognition attendance and real-time application tracking.

PROJECTS

Filament Take Picture Field | *PHP, Laravel, FilamentPHP, Composer Package* Open Source Initiative

- Created and maintained an open-source FilamentPHP form field plugin for capturing images directly from the browser camera, with **32 GitHub stars** and **8,300+ downloads**.

Laravel Scheduled Maintenance | *PHP, Laravel, Queue, Composer Package* Open Source Initiative

- Modernized and maintained an open-source Laravel package for scheduling maintenance windows, showing downtime notices, supporting bypass links, and queue-based maintenance bypass for Laravel 10, 11, and 12.

URSB-ITSL Website | *React, TypeScript, Vite* Front-end Development

- Built and deployed the official college org website for the URSB BSIT Students' League using React, TypeScript, and Vite, serving as the organization's sitting president at the time of launch.

GIT.RAWify | *JavaScript, Bootstrap* Front-end Development

- Built a developer tool that converts GitHub links into raw content URLs, generating over **86K impressions** and **3.39K clicks**.

MMC MIS (Lead Developer & Project Manager) | *Laravel, MySQL, AI* September 2023 - March 2025

- Led the team as Project Manager and Lead Developer in building a church Management Information System that automated church administrative operations and won **Best Software Developmental Study** at the 18th Campus Research Congress.

IOTC Seafarer Application System | *Laravel, FilamentPHP, Face Recognition* Freelance Client Project

- Built a full-stack seafarer certification system for a freelance client with facial recognition attendance, exam management, and real-time application tracking using Laravel and FilamentPHP.
