PROFESSIONAL SUMMARY

Full-stack Software Engineer with experience across freelance and corporate roles, building and deploying production-grade web applications, internal systems, and RESTful APIs. Promoted to Software Engineer within 6 months at Casterly Ventures Corp. for independently delivering three production systems. Specialized in Laravel and the TALL stack, with hands-on expertise in CI/CD pipelines, Linux VPS management, Redis, WebSockets, and database optimization. Author of open-source Composer packages with 8,300+ downloads. Self-driven and experienced working independently across remote and on-site environments.

WORK EXPERIENCE

Software Engineer

Casterly Ventures Corp.

July 2025 - Present

Pasig City, Philippines

- Promoted within 6 months for leading delivery of three production systems.
- Migrated production to a self-managed Linux VPS Server (Ubuntu 24.04, Nginx, CloudPanel), cutting hosting costs by 72% with 4x more RAM and 2x more CPU cores.
- Built atomic GitHub Actions CI/CD pipelines and managed Redis queue infrastructure (8 workers), reducing deploy time by 70%.
- Developed a POS system with barcode scanning, cart management, and dynamic pricing, eliminating manual sales processing for the sales team.
- Built a Warehouse Management System integrated with the IMS, improving inventory traceability across warehouse operations.
- Optimized system performance via composite database indexes and Redis caching, and integrated Google Drive API for automated cloud backup of generated reports.
- Built *casterly.ph* full-stack with a custom Filament CMS, enabling non-technical staff to manage content without developer involvement.
- Configured domain management and Cloudflare DNS, SSL, and security rules for site and shop.
- Built the e-commerce back-end (*shop.casterly.ph*) with order processing, payment integration, promo codes, reviews, and real-time shipment tracking via TrackingMore API.
- Developed a full-stack IMS for ITAD operations processing 2,200+ devices through an automated 8-stage workflow, architected as a modular monolith with service-layer pattern and config-driven design to support long-term maintainability and scalability using Laravel and FilamentPHP.
- Implemented Blancco/Specocy XML parsing for automated laptop spec extraction and queued Excel/PDF reporting; integrated Laravel Reverb via WebSockets for real-time inventory and workflow updates.

Backend Developer Intern

Bapplware Technologies, Inc.

February 2025 - April 2025

Mandaluyong City, Philippines

- Developed RESTful API modules for the HRP-API platform using PHP Symfony in Agile workflows.
- Implemented error handling, soft deletes, and timestamps to improve API reliability and data integrity.
- Wrote PHPUnit test cases to ensure code quality and catch regressions before deployment.
- Contributed to Agile sprints remotely, including sprint planning, daily standups, and feature delivery.

Freelance Developer

Remote

June 2020 - January 2025

- Designed and delivered custom software systems for government and academic clients across 5+ years.
- Built a desktop Employee Management System for the Philippine Air Force Headquarters Service Support Group (HSSG) using Java Swing, with role-based access control and reporting.
- Developed a web-based Student Internship System for the University of Rizal System using Laravel and FilamentPHP, deployed for student use.

PROJECTS

- Filament Take Picture Field** | *PHP, Laravel, FilamentPHP, Composer Package*

Open Source Initiative

 - Created and maintained an open-source FilamentPHP form field plugin for capturing images directly from the browser camera, with **32 GitHub stars** and **8,300+ downloads**.
- Laravel Scheduled Maintenance** | *PHP, Laravel, Queue, Composer Package*

Open Source Initiative

 - Modernized and maintained an open-source Laravel package for scheduling maintenance windows, showing downtime notices, supporting bypass links, and queue-based maintenance bypass for Laravel 10, 11, and 12.
- URSB-ITSL Website** | *React, TypeScript, Vite*

Front-end Development

 - Built and deployed the official website for the URSB BSIT Students' League with static site optimization and SEO.
- GIT.RAWify** | *JavaScript, Bootstrap*

Front-end Development

 - Built a developer tool that converts GitHub links into raw content URLs, generating over **86K impressions** and **3.39K clicks**.
- MMC MIS (Lead Developer & Project Manager)** | *Laravel, MySQL, AI*

September 2023 - March 2025

 - Led the team as Project Manager and Lead Developer in building a church Management Information System that streamlined administrative workflows and won **Best Software Developmental Study** at the 18th Campus Research Congress.
- IOTC Seafarer Application System** | *Laravel, FilamentPHP, Face Recognition*

Freelance Client Project

 - Built a full-stack seafarer certification system for a freelance client, covering application submissions, exams, interviews, facial recognition attendance, and real-time status tracking using Laravel and FilamentPHP.
- URSB Internship System** | *Laravel, FilamentPHP, MySQL*

Freelance Client Project

 - Developed a web-based Internship Management System for the University of Rizal System, enabling students to manage internship requirements, progress, and personal records.

SKILLS

Primary Stack: PHP, Laravel, Livewire, Alpine.js, Tailwind CSS, Blade, MySQL, Redis, FilamentPHP
Frontend: JavaScript, Vue.js, jQuery, HTML/CSS, Bootstrap, React.js, TypeScript, Vite
DevOps & Infrastructure: Linux (Ubuntu), Nginx, Cloudflare, Docker, CloudPanel, GitHub Actions, Git
Tools: PHPUnit, Postman, Composer
Other Languages: Java, C#, VB.Net
Methodologies: Agile (Scrum), Kanban

EDUCATION

- University of Rizal System**

Binangonan, Rizal

Bachelor of Science in Information Technology

Aug 2022 – Jun 2025

 - Student Organization President (2024-2025) and Vice President (2023–2024) of the URSB BSIT Students' League; Public Information Officer (PIO) of the URSB Graduating Class 2025.
